 Point & Linear Drain Kits

At Marmox we supply a range of products for waterproofing & insulating.

Well known for the Marmox Multiboards, used to coat floors and walls and then tiled, plastered or rendered, we also supply a range of wetroom floor solutions that can work hand in hand with Multiboards to create a complete wetroom.

It's easier than ever to create a sloping wetroom floor, ready for tiling. Several options are available to meet different needs, including various size floor formers and drainage systems, which make it easy to create a bespoke floor slope.

Why use Marmox Wetroom Floor Products?

FULLY WATERPROOF

All of our wetroom floor systems allow for a completely waterproof wetroom or bathroom floor. Various accessories are available for further waterproofing.

LIGHTWEIGHT & EASY TO CUT

Marmox Showerlays are polystyrene (XPS) based and offer a very lightweight, trimable solution which is easy to cut with a saw and clean to handle.

EFFECTIVE DECOUPLING

The combination of the rigid outer shell and the XPS core, which absorbs lateral movement, makes for an effective decoupling layer.

MARMOX LIFETIME GUARANTEE

Marmox product range comes with a Lifetime Guarantee for total peace of mind.

Marmox Wetroom Floors

There are 5 different drainage options in the Marmox UK range. This includes both linear and square drain options.

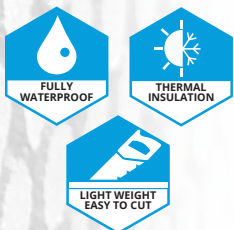

Linear Drain
Pre-formed slope

Key Benefits

- Pre-formed fall ready to receive tiles
- Lightweight
- Quick & easy to install
- Waterproof fleece

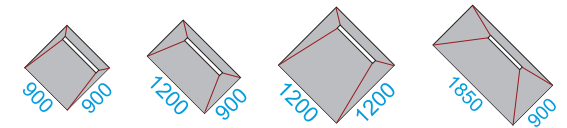

Linear style floor level shower base

Showerlay Linears are constructed from high density polystyrene, extruded to the precise shape and dimensions required to ensure a suitable flow rate to the in-built drain. Marmox foam is coated on both sides with a fibreglass mesh embedded in a unique blend of Marmox cement polymer mortar, then topped with a waterproof fleece. The fleece overlaps by 100mm, which can be adhered down to joining substrate, creating a waterproof joint & peace of mind.

Linears are 40mm thick on the perimeter with a stylish brushed stainless steel linear channel grate. They feature a height adjustable drain grate to match the height of thicker tiles when necessary.

Square Drain
Pre-formed slope

Key Benefits

- Pre-formed fall ready to receive tiles
- Lightweight
- Quick & easy to install
- Waterproof fleece

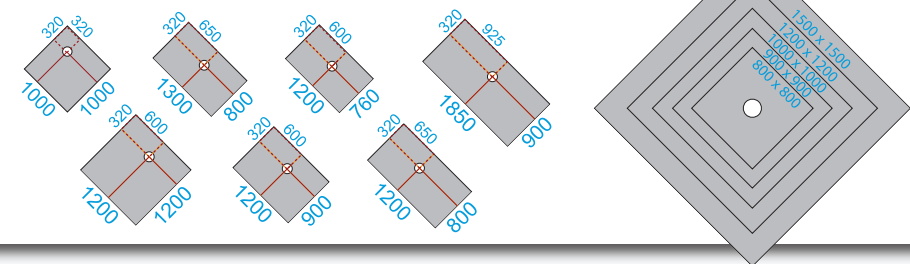

Square drain style floor level shower base

Showerlays are constructed from high density polystyrene, extruded to the precise shape and dimensions required to ensure a suitable flow rate to the in-built drain. Marmox foam is coated on both sides with a fibreglass mesh embedded in a unique blend of Marmox cement polymer mortar, then topped with a waterproof fleece. The fleece overlaps by 100mm, which can be adhered down to joining substrate, creating a waterproof joint & peace of mind.

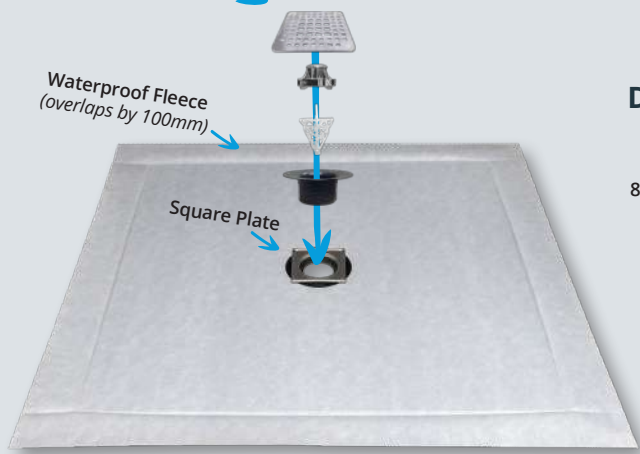

Showerlays are 20-24mm thick on the perimeter (depending on size) with a brushed stainless steel grate in various locations. They feature a height adjustable drain grate.

Wetroom Tray
Pre-formed slope

Key Benefits

- Stylish design finish
- Pre-formed slope
- Fully waterproof
- Centre or offset drain

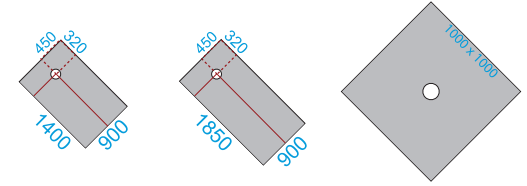

Stone effect, pre-formed, resin shower floor former

The Decotray is an excellent choice for designing a stylish, sloping floor with a visually appealing aesthetic and a high-quality finish. It is crafted from Marmoxite, a patented resin-bound synthetic stone.

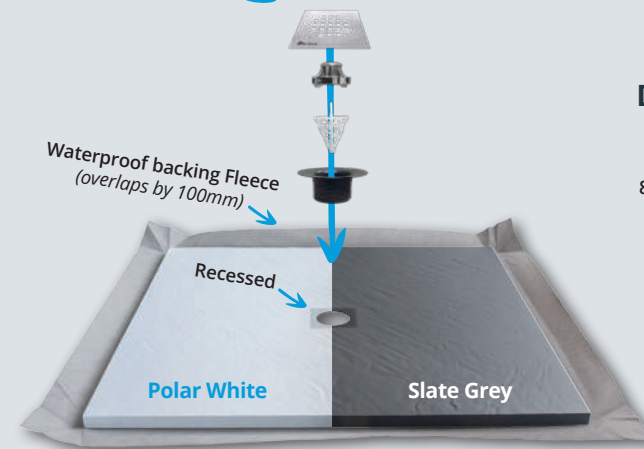

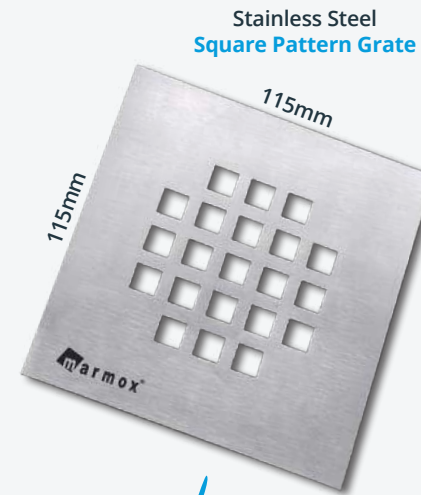

The design ensures that it not only looks stunning but also provides a functional and long-lasting solution for wetroom floors. Whether you prefer the sleek, modern look of Slate Grey or the crisp, clean appearance of Polar White, the Decotray delivers a premium finish that enhances any space.

Linear Drain
Create your own slope

Key Benefits

- Create bespoke slope
- Square or linear drain
- Slimline or 360° waste
- Various grate options

Create your own shower slope

Minilay provides the flexibility and freedom to transform any concrete floor into a tileable wetroom floor.

Marmox Minilay is a drainage gully which has been factory fitted into a height adjustable frame, which itself sits within a small rigid board. This small board provides a solid surface immediately around the drain from which the slope of the shower floor can be continued with the screed.

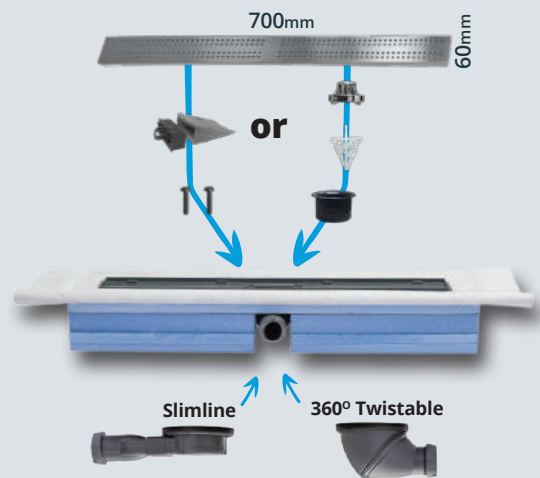

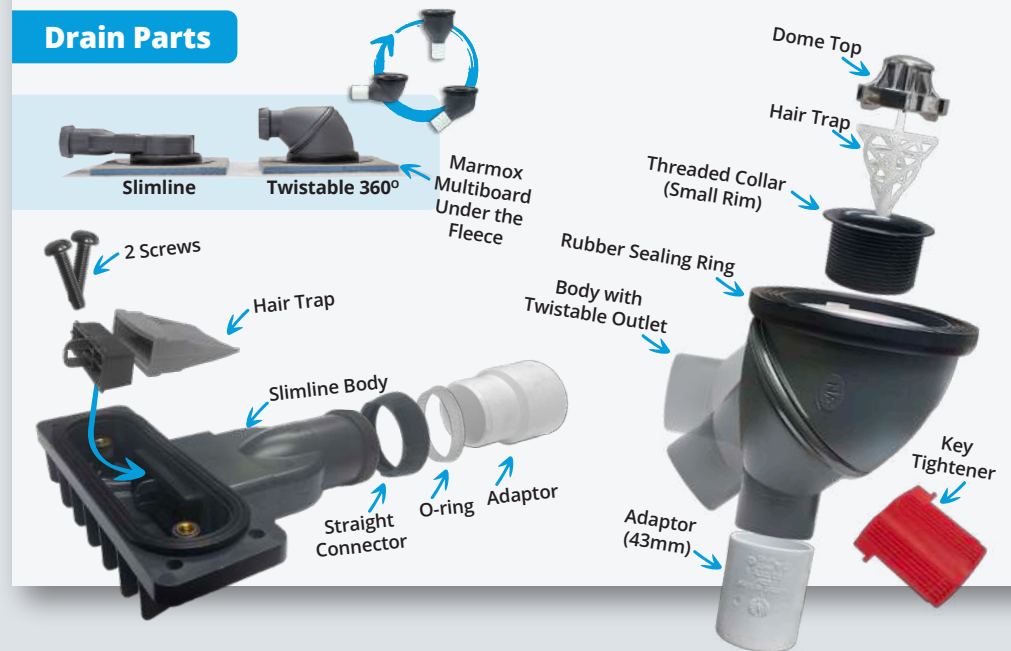

Available with a twistable 360° or a slimline waste, in Linear and Square drain options.

marmox multiboard

Waterproofing • Insulating • Drylining

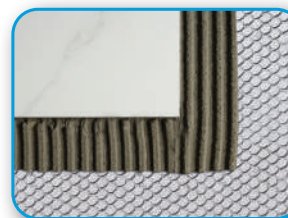

The tried and trusted construction material which merges water proofing, insulation and structural strength into a reliable, BBA certified board. Lightweight and easy to cut with minimal dust, it accommodates tiling, plastering, and rendering, both indoors and outdoors.

UK
CA CE

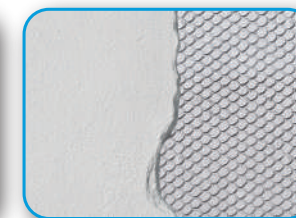

Tile it • Plaster it • Render it

Tiles - Ultimate substrate for tiles. Hold up to 100kg/m²

Plaster - No need to PVA, plaster directly onto them

Render - Will support many different types of render
